

**fpf-all**<sup>0,22</sup>

$\forall x \in \text{dom}(f). v = f(x) \Rightarrow P(x;v) \equiv_{\text{def}} \forall x:A. x \in \text{dom}(f) \Rightarrow P(x;f(x))$

*clarification:*

$\text{fpf-all}(A; eq; f; x, v. P(x;v)) \equiv_{\text{def}} \forall x:A. \text{fpf-dom}(eq; x; f) \Rightarrow P(x; \text{fpf-ap}(f; eq; x))$
