

es-rcv-atom^{11,40}

e receives $\parallel a \equiv_{\text{def}} (\uparrow \text{isrcv}(e)) \Rightarrow \text{val}(e) : \text{valtype}(e) \parallel a$

clarification:

$\text{es-rcv-atom}(es; e; a)$
 $\equiv_{\text{def}} (\uparrow \text{es-isrcv}(es; e)) \Rightarrow \text{free-from-atom}\{1\}(\text{es-valtype}(es; e); \text{es-val}(es; e); a)$
