

p-measure-le^{11,40}

$\text{measure}(C) \leq q \equiv_{\text{def}} \forall n:\mathbb{N}. \text{E}(n;\lambda s.C(\langle n, s \rangle)) < q$

clarification:

$\text{p-measure-le}(p;C;q) \equiv_{\text{def}} \forall n:\mathbb{N}. \text{expectation}(p;n;\lambda s.C(\langle n, s \rangle)) < q$
